# COSMETIC RESTORATION

## Prosthetic Eye / Orbital Prosthetic Services

An artificial, prosthetic eye with lids may be called an orbital prosthesis. An orbital prosthesis is a removable prosthesis that artificially restores the eye, eyelids, and surrounding bone and skin lost as a result of trauma or surgery. An orbital prosthesis offers an alternative to rehabilitation when surgical reconstruction of an orbit can not be achieved.

Prosthetic eyes can be attached either through the use of adhesives or craniofacial implants. Orbital prostheses are made from a medical grade silicone that is intrinsically colored to match the specific pigmentation of the individual and contains an artificial eye that is made out of acrylic. While an artificial eye will not blink or move in harmony with the remaining eye, it blends into the face making it look whole once again.

## Auricular Prosthesis

An artificial / ear prosthesis restores a portion or the entire outer ear. The auricular prosthesis provides a form of rehabilitation when surgical reconstruction is not viable or not preferred by the patient.

Ear prosthesis can be attached to the patient either via a skin adhesive or osseointegrated or craniofacial implants. The artificial ear prostheses are made of a medical silicone which is coloured to match the natural skin.

## 471 HARMONY SILK TRIANGLE

### Shallow to average lightweight triangle

The original for matching mature breast tissue. Works well with both underwire and softcup bra styles. Enhanced softness and relaxed drape ensures maximum comfort and a natural appearance. Fits a wide range with size from 1-17.

PI-SB-061

## IMPRESSION

### Description

**Natural:** The unique blend of pure silicone used in Impressions provides the softest and smoothest feel imaginable. The integrated nipple & areola enhances and restores femininity.

**Lightweight:** As the lightest breast form available, Impressions is perfectly balanced to suit every lifestyle

**Comfort:** The 3D profile of impressions contours perfectly in the bra and molds beautifully to each individual. The honeycomb core ensures optimum breath ability. **Available in sizes 4-12**

## IMPRESSION II

### Description

**Natural:** Features a shallower profile, based on the world's #1 selling breast form, Trulife's 471 Silk Triangle.

**Lightweight:** Advanced lightweight honeycomb design for enhanced durability and breathability.

**Comfort:** New finely tapered edges provide an intimate and seamless fit, Features an even softer and silkier surface. **Model No. 101 | Symmetrical Triangle | Profile: Shallow to Average | Sizes: 4-12**
